9	<div> <div>GO</div> <div>EXEC Sales.GetTopCustomers;</div> </div>																																												
10	<div> <div>--- soal 10</div> <div>--- Msg 201, Level 16, State 4, Procedure Sales.GetTopCustomers, Line 0 [Batch Start Line 62]</div> <div>--- Procedure or function 'GetTopCustomers' expects parameter '@orderyear', which was not supplied.</div> <div>--- Error tersebut dikarenakan tidak adanya parameter pada kode executenya</div> </div>																																												

11

--- soal 11

```
EXEC Sales.GetTopCustomers;
```

Pada kode pertama, tidak terjadi error karena parameter @orderyear diberi nilai default NULL dengan sintaks @orderyear int = NULL. Hal ini memungkinkan stored procedure dijalankan tanpa harus menyertakan nilai untuk @orderyear. Jika @orderyear tidak diberikan nilai saat pemanggilan, maka secara otomatis akan bernilai NULL

12

Secara umum, jika perubahan pada stored procedure mengubah cara pemanggilan atau hasil yang dikembalikan, aplikasi mungkin perlu diperbarui. Namun, perubahan internal atau optimasi prosedur sering kali tidak mempengaruhi aplikasi

13

```
EXEC Sales.GetTopCustomers;
```

15

- **Jika parameter baru memiliki nilai default**, aplikasi tidak perlu diubah, karena nilai default akan digunakan jika parameter tersebut tidak disertakan.
- **Jika parameter baru tidak memiliki nilai default**, aplikasi perlu disesuaikan agar selalu menyediakan nilai untuk parameter baru.
- **Jika parameter baru mempengaruhi hasil query**, aplikasi perlu disesuaikan untuk menangani perubahan struktur data yang dikembalikan.
- **Jika perubahan tidak mempengaruhi query atau hasil**, aplikasi tidak perlu diubah.
